Art Unit: 3727

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There doesn't appear to be any description in the specification of the uppermost planar surface of the ridge member extending between the upper end and lower end and "sloping downwardly towards the concavity form, the convex outer side wall to the concave inner side wall" as now claimed in new claim 9.
2. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The limitations set forth in claim 8 appear to be already claimed in new claim 9 at lines 8, 9 and 13-15.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 9 and thus 2-4 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 recites the limitation "the indication of the ridge member" in 13. There is insufficient antecedent basis for this limitation in the claim.

Applicant hasn't set forth any indicators for the ridge member.

On line 19 of claim 9 it appears that "form" is a typo.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 3727

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9 and 2-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,598,743 in view of Shenoha, of record.

To have formed the planar surface of Puskaric such that it slopes downwardly from the outer side wall to the inner sidewall towards the concavity would have been obvious in view of Shenoha teaching a club divider with planar sloping walls which slope from the outer side wall with the notch toward the inner side wall (see Figure 7).

5. Applicant's arguments, see pages 5 and 6 of the amendment, filed 1/24/05, with respect to the objection to the declaration and rejection of claims 1 and 5-7 have been fully considered and are persuasive. The objections and rejection of the declaration and claims has been withdrawn.

Applicant's arguments with respect to claim 9 have been considered but are moot in view of the new ground(s) of rejection.

Claims 2-4, 8 and 9 have been rejected while claims 1 and 5-7 have been canceled.

6. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with
